

Priority F&B

The 'perfect recipe' for operational success

A comprehensive business management solution for the food and beverage manufacturing industry, **Priority F&B** gives you the tools you need to control and maintain every aspect of your daily operations. From procurement of raw materials, inventory, sales and supply chain management – to administration, financials and supporting regulatory compliance, with **Priority F&B**, your manufacturing and distribution process is guaranteed: *smooth, streamlined and cost-effective.*

Priority F&B serves a wide range of sub-industries in this vast market, from dairy product manufacturers, meat processing plants and fruit and vegetable distribution centres, to wholesalers and retail chains of varying sizes. It's Priority's flexible and open system that focuses on the heart of your business, in support of what matters most – *food safety and quality.* This means reliable tracking and traceability, raw materials and inventory visibility, and managing perishable materials and products with limited shelf-life.

At **Priority**, we understand the challenges unique to your industry that include multiple product lines and processes with sometimes infinite modifications and changes. Not just changes to your end products, but also to packaging and pricing. It's here that an advanced and reliable ERP system can and will make a significant difference – to reduce operational costs, boost productivity and improve your bottom line.

Built to support process manufacturing

- Delivers industry-rich functionality across all major F&B sectors/sub-industries
- Quick and easy system implementation and user training
- Built-in best practices and F&B industry specialisation
- Robust ERP and configuration functionality, including advanced security
- Supports QA compliance and industry regulations
- Mobile-friendly interface with fast, easy access from any mobile device/tablet

The tools and functionality you need to boost your business

ERP software helps streamline your business processes and reduce internal errors by automating your entire manufacturing process. Automated operations lead to increased productivity, enhanced customer service and a high return on investment. *This is Priority F&B.*

- **Single data source** – clear, accurate, real-time data across your entire enterprise
- **Tracking and traceability** – holistic view of your end-to-end manufacturing process from inventory and raw materials processing to final product and distribution
- **Enhanced decision-making** – real-time data access powers management decisions that are backed by reliable information and metrics
- **ERP on-the-go** – system access via mobile devices/tablets anytime, anywhere for technicians/sales reps in the field, warehouse staff and multi-sites
- **KPI measurement** – process costs, financials, sales orders and quality control clearly displayed on intuitive dashboards/screens
- **Enhanced customer service** – delivering quality products on time and on budget
